To Whom It May Concern:

Subject: Billy Flake, Safety Professional
Pearson Safety Services
Division of Jabezco Ind. Grp.

Lurgi, Inc. has had the successful experience of working with a safety professional, Billy Flake, as well as the safety professional company, Pearson Safety Services. Both have been a rewarding opportunity for Lurgi.

Billy provided Lurgi with his professional expertise, knowledge and training of 22+ years in safety at one of our projects in California. This project placed Billy a long way from home and family, which are just north of Memphis. There were many safety issues with contractor management, field personnel and personalities that Billy had to manage. Billy's knowledge of OSHA and CalOSHA was a tremendous help to the management of the project. Plus, his burning desire to see that tasks were performed in a safe manner and safe behaviors were instilled.

Throughout the timeframe, Pearson Safety Services has constantly checked to make sure that everything was in "safe" order. Which included reminders that training was available through their Bartlett office for First Aid, CPR, AED and OSHA compliance. Plus the other audit and compliance services that Pearson Safety offers to their clientele

Both Billy and Pearson Safety have taken an interest in furthering Lurgi's safety performance and people assets. Lurgi appreciates this opportunity of working with professionals.

Respectively,

Tommy Hinote
